

PROFRACTIONAL RESURFACING

Skin resurfacing to stimulate collagen in the dermal layer of the skin. By tightening the skin, it improves the appearance of scars, stretch marks, fine lines, and wrinkles. Profractional may be combined with MicroLaser Peel or BroadBand Light. Downtime consists of redness and swelling.
Consultation with your dermatologist is required

LASER HAIR REDUCTION

If you're not happy with shaving, tweezing, or waxing to remove unwanted hair, laser hair reduction is worth considering. Using highly concentrated light, it reduces the growth of hair by destroying the follicles. Package treatments are strongly recommended; results are best seen with at least 6-8 treatments.
