

PROFRACTIONAL RESURFACING

Skin resurfacing to stimulate collagen in the dermal layer of the skin. By tightening the skin, it improves the appearance of scars, stretch marks, fine lines, and wrinkles. Profractional may be combined with MicroLaser Peel or BroadBand Light. Downtime consists of redness and swelling.

Consultation with your dermatologist is required

LASER HAIR REDUCTION

If you're not happy with shaving, tweezing, or waxing to remove unwanted hair, laser hair reduction is worth considering. Using highly concentrated light, it reduces the growth of hair by destroying the follicles. Package treatments are strongly recommended; results are best seen with at least 6-8 treatments.

LASER SERVICES

BBL HEROic™

BBL HEROic™ delivers precise pulses of light energy that target specific areas beneath your skin's surface. When this light energy reaches its target—whether that's excess pigmentation, redness, or aging skin cells—it triggers your body's natural healing response. Your body begins to remove damaged or pigmented cells while boosting collagen production, resulting in clearer and more youthful-looking skin. The improvement continues even after the treatment as your body's natural healing process remains active.

MOXI™

MOXI™ Laser by Sciton is a gentler, more approachable version of traditional laser treatments. By delivering controlled laser energy, MOXI stimulates collagen production and targets unwanted pigmentation, helping to enhance skin texture and tone. What makes MOXI particularly unique is that it's what we call "non-ablative," meaning it works its magic without removing the top layer of your skin.
